

A floor plan diagram showing a room with a tiled floor. The room is divided into several sections by thick black lines representing walls. On the left side, there is a vertical strip with a pattern of 'x' marks, possibly representing a window or a specific wall treatment. The floor is covered in a grid of light-colored tiles. Several areas are labeled with their respective areas in square meters (m²). There are also some dashed lines and a circular pattern in the lower right section, which might represent a doorway or a specific architectural feature.
